

D2BS BEGINNER STRENGTH + HYPERTROPHY

The goal of this 4-week program is to build a strength foundation while learning how to create “enough” tension in the muscles you’re working to stimulate protein synthesis. Remember, the body doesn’t know how much weight you’re lifting...only HOW MUCH TENSION you’re creating. So, put your focus on mastering all phases of each movement...the concentric, eccentric and isometric so that you can execute the perfect rep every time.

Program Parameters

- **Frequency** – This is a 6x/week program. If you work out less frequently, focus on the weightlifting days ...Monday, Tuesday and Thursday, Friday.
- **Load** – Pick a weight that you can comfortably do for 10-12 reps, or use RIR (reps in reserve) to test that you’re challenging yourself enough.
- **Volume** – Follow the weekly rep scheme where 3x8@2-3 min means 3 work sets with 2-3 minutes rest between sets
- **Tempo** – Use a normal rep tempo (3-1-3-0) unless otherwise stated (aka 3 second eccentric “lowering or negative phase of lift”, 1 second at lowest part of lift (isometric), 3 second concentric (“lifting or positive phase of lift”) and 0 at top portion of lift). Constant tension means don’t lock out or pause at end of movement.
- **Pain** – If at any point during an exercise you feel pain, stop.
- **Cardio (Optional)** – You can also add 20-25 minutes of low intensity, steady state cardio (aka treadmill, stationary bike, row machine, etc.) at the end of the workout.

Exercise	Rep Method/ Tempo	RIR	Week 1	Week 2	Week 3	Week 4	Cues
Monday (Upper Body)							
BB Bench Press	Normal 3-1-3-0	3	3 x 8@2 min	3 x 8@2 min	4 x 8@2 min	4 x 8@2 min	Engage your shoulders and arms before pressing up. Imagine trying to break the bar with your hands.
Decline DB Squeeze Press	Constant Tension	3	3 x 10@90 sec	3 x 10@90 sec	4 x 10@90 sec	4 x 10@90 sec	Put a couple of plates at foot of bench so body at slight decline. Squeeze the DBs together in an isometric hold while pressing up. Don’t lock out at the top.
1-Arm DB Row	Normal 3-1-3-0	3	3 x 10@60 sec	3 x 10@60 sec	4 x 10@60 sec	4 x 10@60 sec	Maintain neutral spine as pull DB to hip. Hold at top for 1 second. Release slowly
